### SCREEN CHANNEL SYSTEM S-3000 and S-3001

Approved by THX for THX system

K.C.S. acoustic systems **S-3000** and **S-3001** are a high quality set specially designed as a screen channel group for large cinema theaters. These acoustic systems include a direct radiation technology bass cabinet with twin 15" Ø woofer. The treble system includes a compression driver with 4" Ø titanium membrane and 2" Ø mouth with a constant directivity horn. S-3000 system incorporates a passive crossover with 500 Hz cutoff, while S-3001 is designed for bi-amplified applications and to operate with 500 Hz external electronic crossover.

### ACOUSTIC SYSTEMS S-2400 and S-2401

K.C.S. **S-2400** and **S-2401** speaker systems are specifically designed for medium size auditoria. These speakers systems feature a bass cabinet with direct radiation technology and fitted with two 15" Ø woofers. Its high-frequency section consists of a compression driver with titanium membrane and a constant directivity horn, providing optimum coverage. S-2400 speaker system has a passive crossover with cut frequency at 800 Hz, while S-2401 is designed for bi-amplified applications with external electronic crossover at 800 Hz.

Special price

535,00 €

prezzo di listino 714,00

### SURROUND CHANNEL SYSTEM SR-10-A

Approved by THX for THX system

The **SR-10-A** system is specifically designed for high quality two-way surround-channel sound.

The SR-10-A system is a speaker cabinet consisting on a high frequency constant dispersion driver-horn with 1" Ø dome, a 10" Ø woofer.

The crossover is passive-type, with a 2,000 Hz cut.

The SR-10-A has a switch to obtain two different response curves for the installations offering the following possibilities:

- (1)(ISO 2969) Response to ISO 2969 cinema surround rolloff curve.
- (2)(Flat) Flat response for improved high frequencies.

SCREEN CHANNEL SUBWOOFER SYSTEM

**C-118-A**

The **C-118-A** houses one K.C.S. S-1846 18" Ø woofer. This is extra-long excursion cone driver featuring 4" Ø coil, massive magnetic circuitry, and carefully engineered cooling schemes, resulting in high power handling and low power compression. The speaker is arranged as a direct radiator, resulting in a deep and highly linear bass sound.
